## GENERAL SAFETY

**For advice** on the safety and suitability of this equipment contact your local HSS Hire Shop.

**There is a serious risk of personal injury if you do not follow all instructions laid down in this guide.**

**The hirer has a responsibility to ensure that all necessary risk assessments have been completed prior to the use of this equipment.**

**This equipment should be used by an able bodied, competent adult** who has read and understood these instructions. Anyone with either a temporary or permanent disability, should seek expert advice before using it.

**This equipment is designed as a cordoning off barrier only, it is not suitable as a crowd restraint.** If in doubt contact your local HSS Hire Shop for advice.

**Check the condition of the equipment before use.** If it shows signs of damage or excessive wear, return it to your local HSS Hire Shop.

## GETTING STARTED

**Check that you have enough units to for the area to be covered.** Each unit is fitted with a 4 metre retractable tape.

**Take the barriers to where they are being used and position as necessary.**

**Where the post has been removed from the base, simply screw the post into the base, turning clockwise.**

**With each unit in position, fill each base with water to weigh it down.** Open the filler cap, fill with clean water and replace the cap firmly.

**If using the barrier in freezing conditions, leave a minimum 30mm air gap between the water and the top of the base.**

**The fitting on the end of the tape has a slot set in it, which engages with a receiver clip on the top of the next post.**

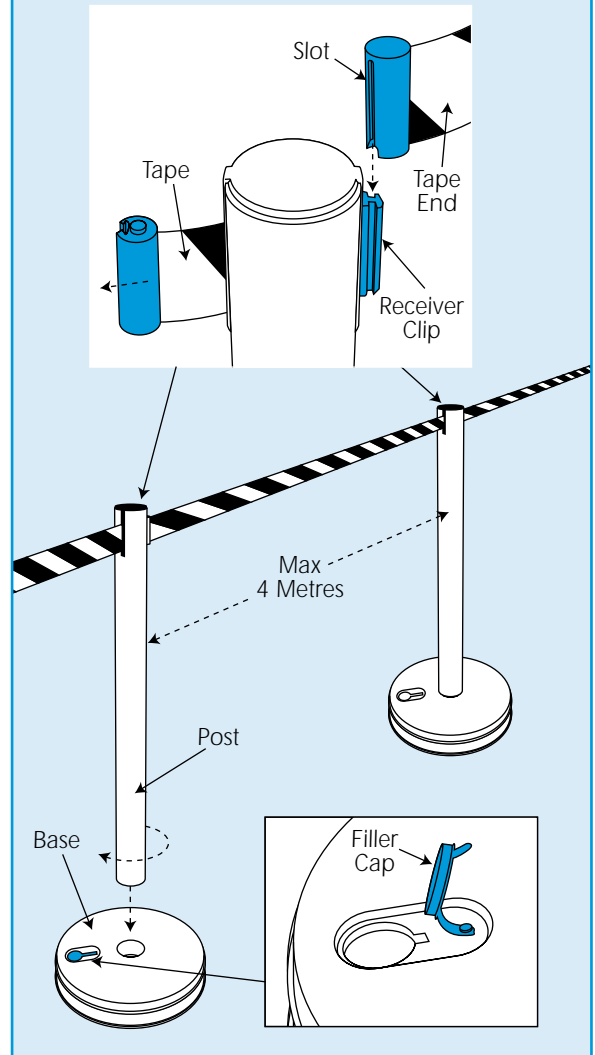

**All that remains is to pull the tape from one barrier and slot its end onto the next one.**

## EQUIPMENT CARE

**Never push the equipment beyond its design limits.** If it will not do what you want with reasonable ease and speed, assume you have the wrong tool for the job. Contact your local HSS Hire Shop for advice.

**Keep the equipment clean** – you will find this less of a chore if you clean it regularly, rather than wait until the end of the hire period.

## Tensabarrier

**When not in use, store the equipment somewhere clean, dry and safe from thieves.**

## FINISHING OFF

**Dismantle the barriers and empty the water from each base.**

**Give each unit a final clean up ready for return, to your local HSS Hire Shop.**
